

# Terminal Automation Host

**FUEL-FACS<sup>+</sup> Central Business System (CBS)**

# Tie all your terminals together

A terminal automation system (TAS) such as the FUEL-FACS+ Facility Business System (FBS) manages individual distribution terminals. The FUEL-FACS+ Central Business System (CBS) ties all those TAS systems together into a single, enterprise-wide resource.

Even if your terminals use competing terminal automation systems or no automation, FUEL-FACS+ CBS connects them all. CBS enables you to manage dozens or hundreds of terminals from a single global location or multiple regional locations with:

- ▶ Real-time visibility and control of the enterprise
- ▶ Cost-effective data exchange between the back office and all enterprise constituents
- ▶ Real-time acquisition, storage, and distribution of information to/from pipelines, terminals, tank farms, data services, outside supply points, and more
- ▶ Real-time reporting of product movements and inventories for management, operations personnel, exchange partners, and customers

## World class project execution reduces risk

The exceptional functionality of FUEL-FACS+ is matched by the experienced project team that designs, develops, installs, and supports each system. Our project team is:

- ▶ Experienced in the oil, gas, and bulk liquid distribution sectors
- ▶ Guided by field-proven, documented project methodologies that are hailed by rigorous customer audits as unmatched in the industry
- ▶ Accomplished at delivering projects on time and on budget

## Full range of project services from one company

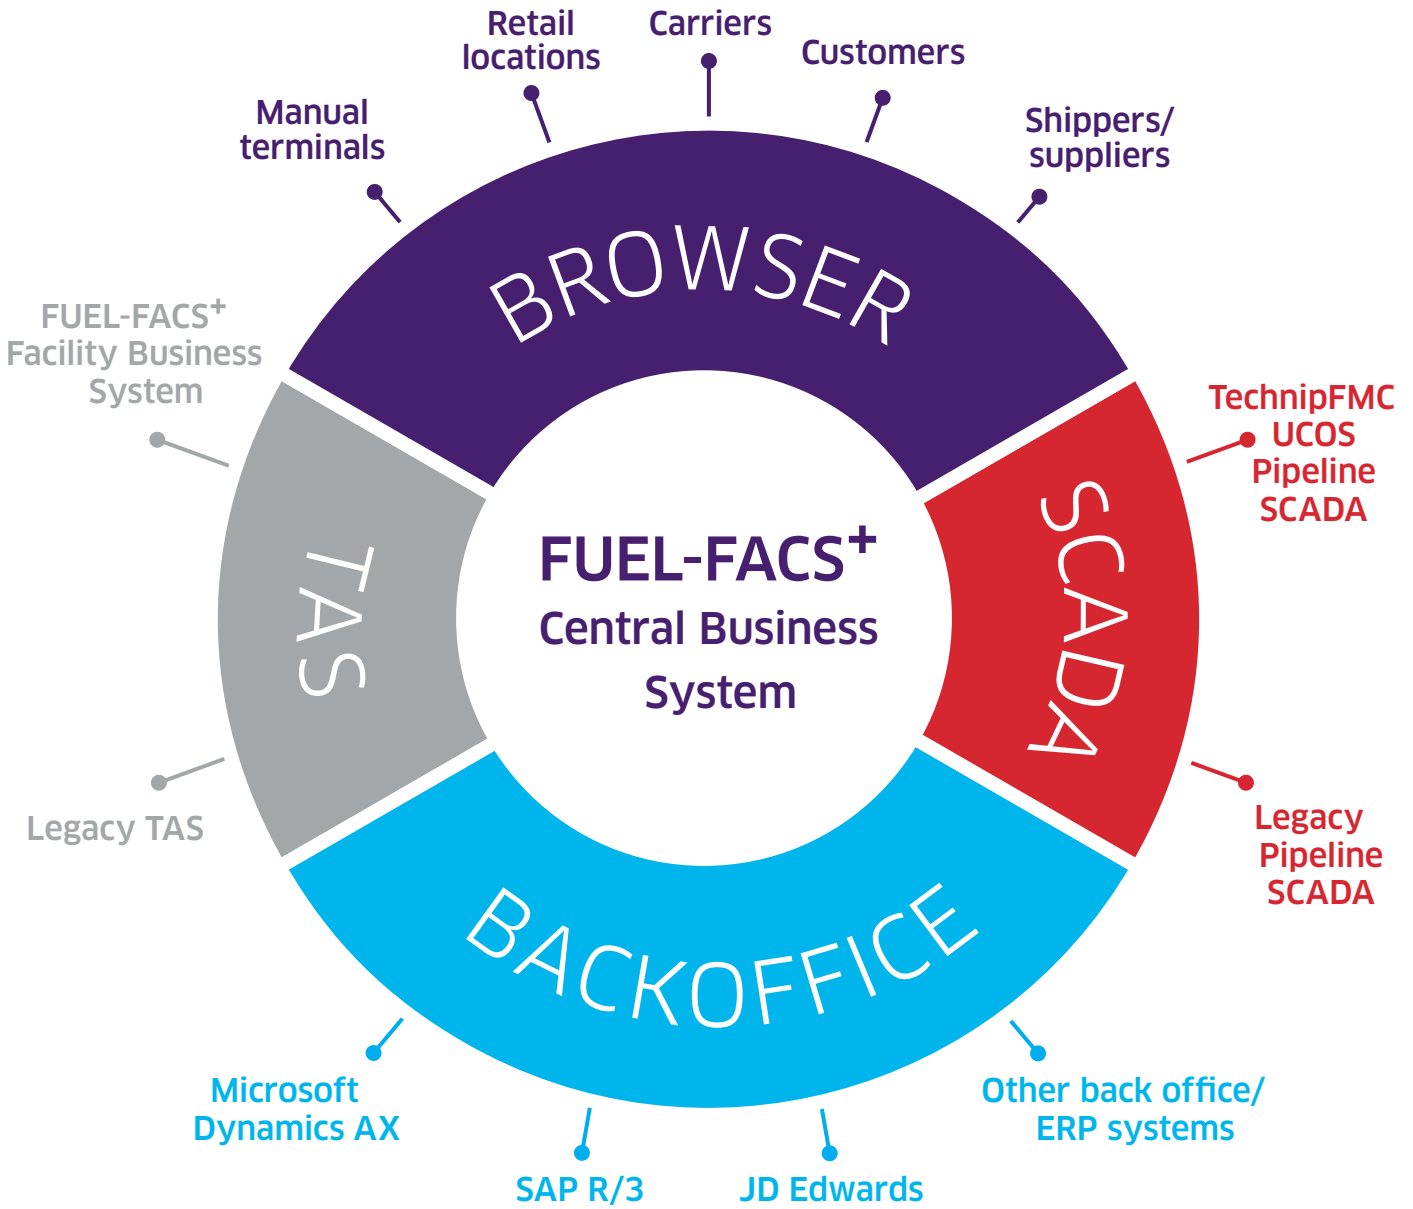

You know how to run terminals. We know how to run terminal automation projects. We have all the expertise and resources necessary to deliver your project from start to finish:

- ▶ Project Management
- ▶ System Design Specification
- ▶ System planning
- ▶ Standardization and integration
- ▶ System configuration and testing
- ▶ Hardware procurement
- ▶ Installation and commissioning
- ▶ Instrument engineering
- ▶ Application development
- ▶ Regional and worldwide rollout
- ▶ Training and documentation
- ▶ System maintenance
- ▶ Product and system support
- ▶ Long term application support

## Comprehensive Support

- ▶ Standard 24x7x365 support
- ▶ Support available for both the software and the configured application
- ▶ In-depth training at your site or ours
