

Revolve™

Enhancing the lifecycle of measurement equipment
through remanufactured equipment solutions

Our Revolve™ program

TechnipFMC is a global leader in measurement and flow integrity solutions, providing the most accurate and reliable performance for mission critical inventory transactions.

In our current business environment, there is an even stronger focus on decreasing risk and driving cost efficiencies.

We understand our clients need operational efficiency, sustainable maintenance costs, a lean stock inventory and minimized downtime in the field while never compromising on safety.

Our Revolve™ program delivers by offering equipment exchange, buy-back, and repair service for our flow measurement products. Clients can receive Revolve™ equipment in like-new condition and with upgraded technology. All equipment is repaired, tested and factory re-certified with a one-year warranty.

We have a dedicated service department for Revolve™ equipment that can disassemble, evaluate, repair, and re-certify equipment accurately and efficiently.

Our team strives to maintain a regular inventory of Revolve™ equipment and rapid response spare parts that the Revolve program can ship within 24 hours.

Benefits

- ▶ Re-certified and factory tested
- ▶ Minimal operational downtime
- ▶ Factory one-year warranty
- ▶ Cost effective
- ▶ Operational efficiency
- ▶ Dedicated Revolve™ service personnel
- ▶ Committed communication
- ▶ Client transparent testing and inspection
- ▶ Improved environmental footprint
- ▶ Factory parts on demand
