

Spare parts

Maximizing operational expenses
through effective inventory planning

Our spare parts team

TechnipFMC is a global leader in measurement and flow integrity solutions, providing the most accurate and reliable performance for mission critical inventory transactions.

We understand our clients need operational efficiency, reduced downtime and a lean stock inventory while never compromising on safety.

Our spare parts team specialists are dedicated experts in inventory management. By leveraging their experience and global supply network, they can help make sure you have the right parts at the right time.

We add value by effectively matching supply and demand to help reduce costs associated with downtime, excess inventory and obsolete equipment. From our shelf to the field service truck, we have the parts you need.

Our stock of subassemblies and components for meters and valves can be replaced by you or our field service technicians. We help you achieve operating excellence on your terms by providing the onsite team to manage the entire process or by recommending and stocking the proper parts inventory.

We will tailor our spare parts service to your specific needs by:

- ▶ Reviewing your site parts inventory and recommending replacing obsolete components and stocking new ones
- ▶ Maintaining spare parts at our location
- ▶ Maintaining spare parts at your location
- ▶ Providing a mobile spare parts truck to serve you

Benefits

- ▶ Operational efficiency
- ▶ Minimal operational downtime
- ▶ Reduced downtime costs
- ▶ Inventory management expertise
- ▶ Spare parts stock on all field service truck
